

We are looking for a
QUALITY MANAGER (M/F/X)

Location: Heidenheim an der Brenz/Berlin or remote (Germany)

Starting: at the next possible date

WHO WE ARE:

THE FORCE builds companies on behalf of clients in the healthcare, pharmaceutical, and medical device sector, supports or manages customer projects of various kinds, and provides customers with qualified personnel to deal with bottlenecks or problems.

THE FORCE encourages work in a flexible surrounding and as a diverse group when it comes to gender, nationality, religion, and ways of working. This unique culture is aimed to integrate employees and partners seamlessly into one organisation.

Likewise, this organisation shall easily adapt to customer organisations. Our unique way of operation will release THE FORCE to solve customer problems in a fast, effective, and efficient manner.

In all of this, people are and will be at the centre of our attention, and the most valuable asset we have: People are our strength. They make us THE FORCE.

WHAT WILL ALLOW YOU TO DIVE IN RIGHT AWAY:

- ✦ Your several years of experience in quality assurance in a manufacturing pharmaceutical company, ideally with close links to production and/or quality control, give wing to a good start.
- ✦ You are well acquainted with the standard processes of a GMP quality system, and have already been able to get your claws on practical experience in various processes.
- ✦ You have a keen eye on the requirements of German and European laws and standards in the area of GMP/GDP.

- ✦ With your hands-on experience in topics such as process validation, qualification of equipment and premises, and/or technology transfer, you easily glide through everyday work.
- ✦ Thanks to your fluency in written and spoken German and English alike, you don't have to brood over your communication with customers or colleagues.

WHAT WILL BE THE WIND BENEATH OUR WINGS:

- ✦ You see the solutions instead of having a dark cloud of problems hanging over you.
- ✦ You love to work efficiently without crash-landing your precision in the process.
- ✦ An independent way of working is your standard, but it doesn't ruffle your feathers to ask for help, when necessary.
- ✦ Your way of communicating is proactive and to the point, without drawing circles around everything.
- ✦ The sky's the limit for your quality awareness: you reflect on your work, soak up knowledge, and strive to constantly improve your skills.

WHAT WILL MAKE YOU FIT THE BILL EVEN MORE:

- ✦ You have broadened your horizons through further practical experience, or are a specialist in topics such as the introduction of electronic systems.
- ✦ Experience in manufacturing processes of various pharmaceuticals such as non-sterile, solid and liquid dosage forms, parenterals, biologics or radiopharmaceuticals is an additional feather in your cap.
- ✦ You have already successfully spread your wings in project management.
- ✦ Your commercial mindset is more than just hot air, and you develop ideas for new businesses or projects.

SOUNDS LIKE YOUR NEW NEST?

Find out if we can flock together and send your application to Tanja Reischl-Stenske.

Please note that we require your CV, cover letter, and any additional application documents in English or German.
