

We're looking for a
DevOps Engineer & Backend Developer (m/f/x)

Location: Antalya
Starting: at the next possible date

You like to do an impressive job in an exciting field of work? You want to develop yourself so you can grow and mature from Padawan to Jedi? Then take the chance to awaken the force in you and become part of our team.

WHERE YOUR NEW COURSE IS HEADED:

- You and our team of developers and system administrators will orbit each other and work closely together.
- You'll promote a collaborative empire for the developers.
- You'll handle and automate the deployment process of our software products.
- You'll have the force with you when it comes to monitoring solutions and logging.
- You'll keep any menace in check by ensuring compliance with the norms, standards, and security requirements necessary for your tasks and solutions.

YOU'RE OUR (ONLY) HOPE IF:

- You have a successfully completed university degree in Computer Engineering or Electronic Engineering (THE FORCE is a Teknokent registered company in Turkey, only graduates from the two disciplines listed above are eligible for recruitment). **(mandatory requirement)**
- You're located in Antalya. **(mandatory requirement)**

- While not necessarily being a Grand Master yet, you have several years of relevant professional experience in software development, operation, service, or operational support. **(mandatory requirement)**
- Neither the development of web applications nor the existence of various cloud service providers is a galaxy far, far away to you.
- A structured, independent way of working, and the organizational talent are strong in you.
- Working in a team doesn't make you want to join the Dark Side.
- You enjoy taking on Padawans of your own for mentoring and sharing knowledge.
- You can manage the infrastructure for the solutions to avoid any crash landings.
- For male candidates in Turkey, military duty should be completed.

WITH THIS KNOWLEDGE, YOU'RE THE DROID WE'RE LOOKING FOR:

- Knowledge of processes, methods, and tools in the field of software development (both traditional and agile)
- Knowledge in common tools and source code management tools (e.g. JIRA, Git) and CI/CD Pipelines
- Knowledge of cloud infrastructure (e.g. AWS, Azure, Docker, IaC (Terraform))
- Knowledge of modern programming languages (e.g. JavaScript, PHP, nest.js, Typescript)
- Knowledge in databases and database analysis
- Knowledge in problem management tools

YOUR NEW SPACECRAFT:

THE FORCE builds companies for companies in the healthcare, pharmaceutical, and medical devices sector.

We encourage work in a flexible surrounding and as a diverse group when it comes to gender, nationality, religion, and ways of working. This unique culture is aimed to integrate employees and partners seamlessly into one organization.

Likewise, this organization shall easily adapt to customer organizations. Our unique way of operation will release THE FORCE to solve customer problems in a fast, effective, and efficient manner.

In all of this, people are and will be at the centre of our attention, and the most valuable asset we have: People are our strength. They make us THE FORCE.

READY TO COME ON BOARD?

You know you've got what it takes to rise to your full potential in this position? Then we look forward to receiving your job application directly via our application form.

Please note that we require all application documents in English.
